

Patterns

note: For those patterns that have been reproduced with a red outline, use the pattern to draw around the shape onto your fabric, and stitch on the drawn line BEFORE cutting out the shape close to the stitching line. This will result in a very accurate sewn shape and is great for awkward shapes and curves. (For your information, this type of pattern is more often referred to as a template in the sewing industry.) All other patterns are cut out and sewn with a 6mm (1/4in) seam allowance unless otherwise specified in the project instructions, and all seam allowances have been added.

note: All patterns on this page have been reduced. For actual size increase by 200%.
